

Do you have

Crohn's disease?

Centre of Research Excellence
in Digestive Health

HMRI
Hunter Medical Research Institute

THE UNIVERSITY OF
NEWCASTLE
AUSTRALIA

Can certain foods you eat trigger a flare?

Researchers at the University of Newcastle are investigating the relationship between diet and Crohn's disease.

You are invited to scan the QR code below and **complete the survey** if you are:

- 18-65 years old**
- Being investigated for Crohn's disease** or have been diagnosed with Crohn's disease within the **past 5 years**
- Able to commit to a diet for 6 months**

If you would like to learn more you can contact the research team:
